-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,5-8,11 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Franchi. Note fusible link 13 in Franchi which is considered replaceable, via mere replacement, power supply 14 which supplies high power to the fuse to melt the fuse, lever7 and link 4 or lever 31 and 27, figure 3 and link 42 which effects release of the load 48. note that the first lever would provide mechanical advantage , barring further description of the same, via its mere presence. Note that lever 7 is hinged, as per claim 5. note transmitter 51 as per claim 6 and the materials are non-corrosive and low friction, since their use occurs in the claimed environment, brass, glass, etc.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2-4,9,10,13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Franchi in view of Hodge et al.

Franchi teaches the claimed subject matter except fro showing the power supply to melt the fuse as comprising a capacitive discharge. The patent to Hodge et al is applied for teaching that it is conventional to use a capacitive discharge to melt a fusible link in a munitions device and use of the same provides adequate power for the melting to occur. In view of this teaching it would have been obvious to modify the patent to Franchi to use a capacitive discharge to effect the fuse melting, to provide adequate power for the melting to occur.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copeland is cited for disclosing a control system of interest.
